

/home/afrodith/IDDRRA
_v3.6/IDDRRA_paper/include
/DetectorMessenger.hh

```
graph BT; A[DetectorMessenger.hh] --> C["/home/afrodith/IDDRRA_v3.6/IDDRRA_paper/include/DetectorMessenger.hh"]; B[DetectorMessenger.hh] --> C;
```

The diagram illustrates a file inclusion or linking scenario. At the top, a gray rectangular box contains the full file path: `/home/afrodith/IDDRRA_v3.6/IDDRRA_paper/include/DetectorMessenger.hh`. Below this box, there are two separate white rectangular boxes, each containing the filename `DetectorMessenger.hh`. A blue arrow originates from the top-right corner of the left box and points to the bottom-left corner of the gray box. Another blue arrow originates from the top-left corner of the right box and points to the bottom-right corner of the gray box. This configuration suggests that both source files are including or linking to the same header file located at the specified path.
